

## **COSA's commitment to closing the gap**

**COSA stands with our Aboriginal and Torres Strait Islander brothers and sisters in calling out racial inequities.**

Aboriginal and Torres Strait Islander people experience 43% worse cancer outcomes than non-Indigenous Australians. Our vision is that ALL Australians receive quality multidisciplinary cancer care from supported and informed health professionals who work in a multidisciplinary manner.

We are committed to closing the gaps in health outcomes and will continue to work with our members to ensure Aboriginal and Torres Strait Islander people with cancer are treated fairly and equally.
